

KANI QUEST PTY LTD

Let us assist you in reducing your environmental impacts:

Organisation

Pathway to achieving carbon neutral organisations

Existing Buildings

Office Tenancies

- Guidance and modelling for NABERS Energy for Office Tenancies
- NABERS rating assessment

- Energy and water audits
- Strategic NABERS Improvement Roadmap
- Modelling of existing baseline and target building energy consumption for monitoring performance
- Roadmap to Carbon Neutrality and Net zero emission target
- NABERS Energy and Water Rating Assessment
- Tenancy Lighting Assessment and Building Energy Efficiency Certificate (BEEC) application
- Carbon Neutrality for Building

Commissioning

- NABERS Energy and Water monitoring as part of commissioning team
- Review metering data robustness for energy monitoring and NABERS rating.

Detailed Design

- Develop baseline energy modelling for NABERS monitoring and benchmarking
- Review alignment of sub-meterings for operational NABERS benchmarking
- NCC Section J JV3 Modelling Report for Construction Certificate

Design Development

- NCC Section J JV3 Modelling
- NABERS Energy and Water modelling
- NABERS Independent Design Review (IDR) for Office Buildings
- Carbon Neutrality
- Green Star Energy modelling, thermal comfort, daylight modelling,
- integrating Green Star Design& As-Built into your project.

Concept Stage

Concept stage advice on measures to achieve target performances, NCC Section J preliminary advice, NABERS concept stage modelling, pathway to Net zero.

Feasibility Study

Develop sustainability brief and target performance for your project.

KANI QUEST PTY LTD

Let us assist you in reducing your environmental impacts

WE PROVIDE SPECIALIST SERVICE IN SUSTAINABILITY

Performance solutions provide flexibility for projects in achieving the required energy efficiency level. With more than a decade of combined experience in delivering sustainable solutions in Australia, our team is best at finding you the optimised solution.

Rokka Yumarsa

Principal Consultant | Director

B.Eng, MCPM

Rokka is a civil engineer with a Master of Construction Project Management from UNSW. He has 5 years of experience in progress control management of oil and gas projects, before converting to become a sustainability enthusiast. He is a NABERS accredited assessors and is keen on helping buildings to reduce their environmental impacts.

Noni Nuriani

Principal Consultant

B.Arch.Eng., M.Des.Sc.

Noni has 12 years of experience as sustainability consultant. She is passionate about improving existing building's energy performance, as well as achieving the best sustainability outcomes in new buildings.

She is a NABERS Accredited professional, a panel member for NABERS Independent Design Review Panel (IDR) for Office buildings, a CBD assessor, A Green Star Accredited Professional, a member of NABERS Steering Committee and a chair of Marketing and Promotion Committee at the IBPSA-Australasia.

Noni is currently pursuing a PhD study at UNSW in improving energy performance gap related to energy modelling practice.
